TECHNICAL SKILLS

Penetration Testing
Ethical Hacking
Web Security
Vulnerability Management
Programming & Scripting
Risk Assessment
HTML / CSS
JavaScript
Tailwind CSS
Python (FastAPI)
Bash Scripting

SECURITY TOOLS

Kali Linux | Nmap Burp Suite | Metasploit Wireshark | OpenVAS Hydra | Netcat VS Code | Git / GitHub

SOFT SKILLS

Problem-Solving |Analytical Thinking
Technical Documentation | Report Writing
Communication | Awareness Training

CERTIFICATIONS

Cybersecurity & Ethical Hacking - Certificate of Completion
CompTIA Security+ In Progress / Target 2026

LANGUAGES

English – Professional

PORTFOLIO

https://ruth-isi02.github.io/My-Portfolio/

PROFESSIONAL SUMMARY

Results-driven cybersecurity professional with hands-on expertise in penetration testing, ethical hacking, vulnerability assessment, and security awareness. Proficient in Python, Bash scripting, and offensive security tools. Skilled in building secure, user-focused web applications and executing realistic attack simulations to

EXPERIENCE

Cyber Security Intern — Apr 2025 - Oct 2025

GEOCONNECT ICT LIMITED – Edo State, Nigeria

Performed vulnerability assessments and network reconnaissance on internal systems using Nmap and OpenVAS. Conducted research into emerging threats and compiled actionable intelligence reports for the security team. Developed and delivered cybersecurity awareness training, reducing simulated phishing click rates. Participated in penetration testing exercises, identifying and disclosing vulnerabilities in web applications.

PROJECTS

BehaveScan – Behavioral Identity Intelligence
JavaScript |Tailwind CSS | HTML5 Canvas API Built real-time bot detection using mouse trajectory analysis, keystroke dynamics, and click pattern intelligence.

OWASP Web Vulnerability Assessment System
Python (FastAPI) | MySQL | Vanilla JavaScript
Architected a full-stack automated web vulnerability scanner guided by the OWASP Top 10 (2021) framework. Implemented a configurable depth-first crawler with form extraction, parameter discovery, and scope boundary controls. Integrated dynamic risk scoring (0–10),

Portfolio Website
HTML | Tailwind CSS | JavaScript
Built a mobile-first personal portfolio with scroll-reveal animations, typewriter effects, and skill bar animations. Implemented a particle system, static project image slots, and an in-browser PDF resume generator.

Intrusion Detection Tool
Python | openpyxl | Multi-threading
Engineered a Python tool performing DNS/IP analysis, enumerating open ports against a known-vulnerable-service database. Automated output to a formatted Excel spreadsheet; used multi-threading to cut reconnaissance time on large IP ranges.

Ransomware Simulation & Awareness Campaign
Python | AES Encryption | LinkedIn Outreach
Designed a controlled ransomware simulation modelling real-world encryption attack chains in a consent-based environment. Published a comprehensive LinkedIn awareness post on attack lifecycle and incident response, reaching a professional audience

EDUCATION

Bachelor of Science – Computer Science — Sep 2022 - Sep 2026
Edo State University, Iyamho, Edo State – Nigeria
